– Preamble –

People involved in the FAUST project represent a wide variety of activities, yet they are united by shared values.

FAUST stands firmly against ableism, antisemitism, fascism, classism, nationalism, queerphobia, racism, sexism, and all forms of discrimination and hostility toward others.

We see ourselves as part of an open, supportive and diverse society.
Together we advocate for:

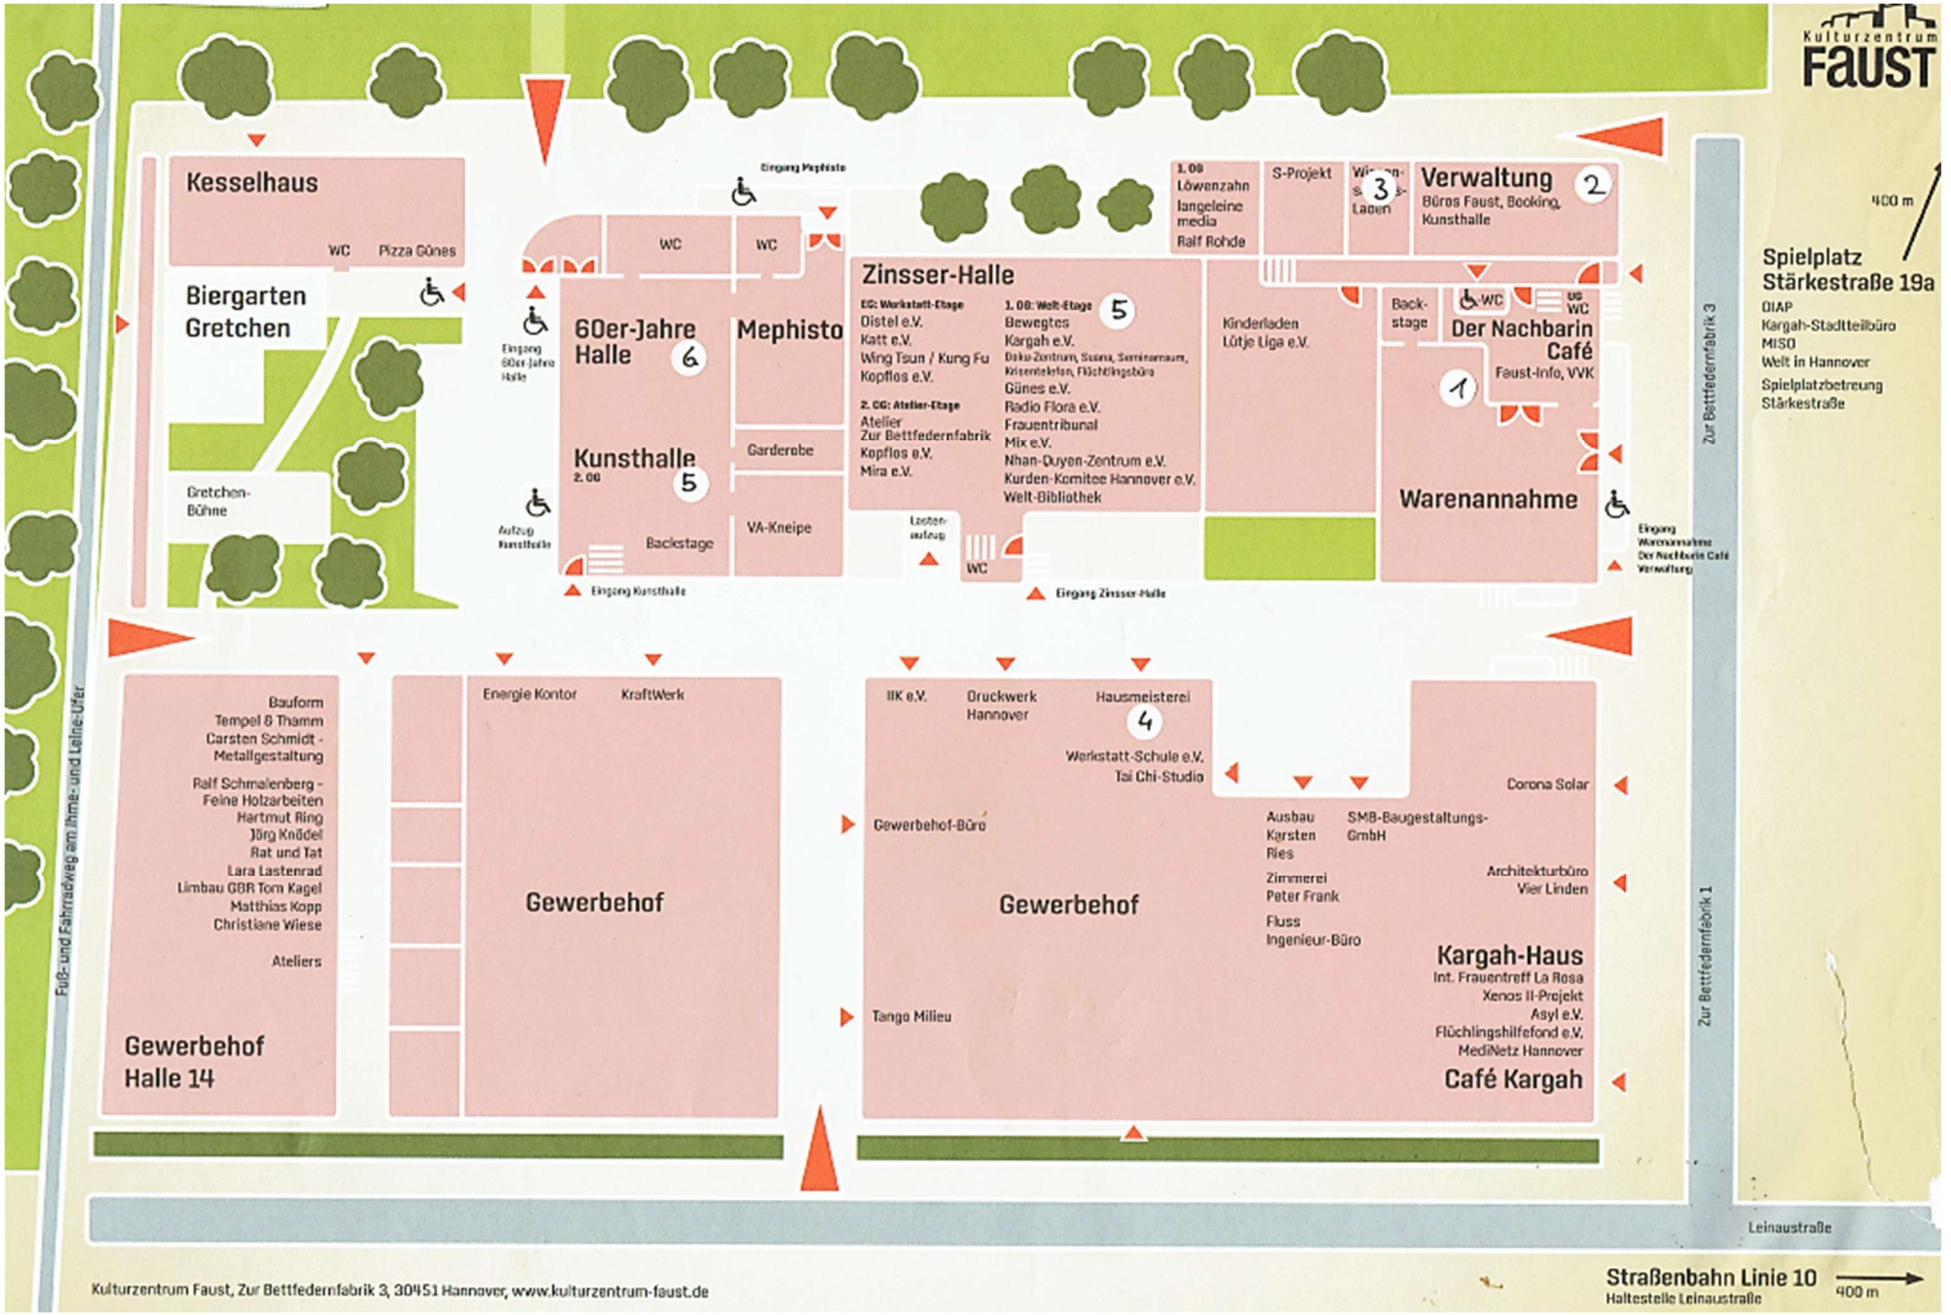

- Equal rights, participation, and self-determination for all people, regardless of gender identity, sexual orientation, origin, religion, disability, age, or social status

- The promotion and defense of democratic, antifascist and humanist values in art, culture and society, combined with resistance against fascist and inhumane ideologies and movements

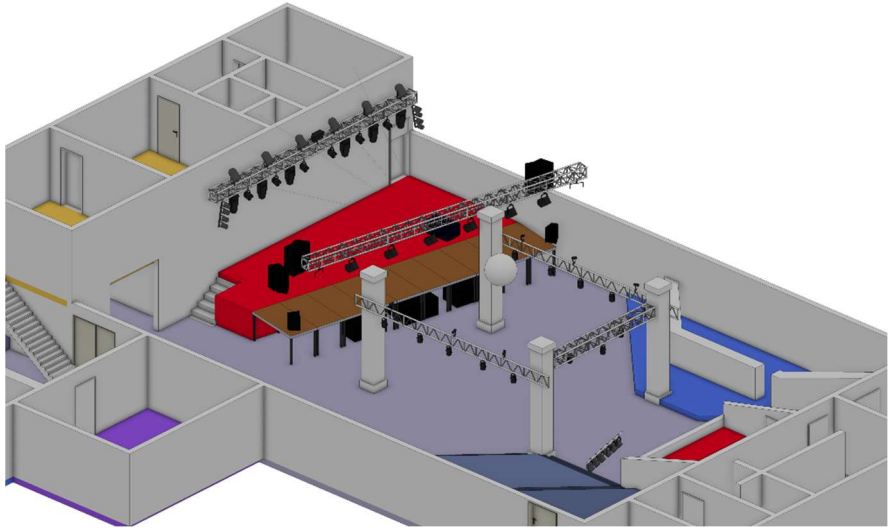

- The creation and preservation of open spaces that encourage discourse, enable encounters and consciously bring people together
